WORK EXPERIENCE

Apex Systems, Remote

Spring 2020 - Present

IT Analyst

- Assist in identifying trends in continuing hardware, software or systems problems.
- Document user problems, resolutions, and new solutions for future reference using Enterprise tools and resources.
- Perform core troubleshooting on hardware/software systems problems; answer questions, provide technical solutions, and follow up to assist users in solving their information systems problems in a continuous user-support environment.
- Work alongside senior analysts to overcome any issues that can be resolved without escalations.

RoadBranding, Remote (Contract)

Summer 2020 - Spring 2020

Web Developer

- Custom Shopify and WordPress theme development built with HTML, CSS, JavaScript, Liquid, and light PHP.
- Consulted project manager and clients on best practices for UX, website speed, and code efficiency
- Implemented a Shopify Plus alternative for a client's E-commerce store saving the client a minimum of \$24k/year. Utilizing liquid code.
